---Original Message---

As requested, here is a brief summary of what I observed at GTMO:

On a couple of occasions, I entered interview rooms to find a detainee chained hand and foot in a fetal
position to the floor, with no chair, food, or water. Most times they had urinated or defecated on
themselves, and had been left there for 18-24 hours or more. On one occasion, the air conditioning
had been turned down so far and the temperature was so cold in the room, that the barefooted detainee
was shivering with cold. When I asked the MPs what was going on, I was told that interrogators from the
previous shift had ordered this treatment, and the detainee was not to be moved. On another occasion, the
A/C had been turned off, making the temperature in the unventilated room probably well over 100
degrees. The detainee was almost unconscious on the floor, with a pile of hair next to him. He had
apparently been literally pulling his own hair out throughout the night. On another occasion, not only
was the temperature unbearably hot, but extremely loud 'rap' music was being played in the room, and
had been since the day before, with the detainee chained hand and foot in the fetal position on the tile
floor.

Any questions, feel free to call or ask via email.

Mr. 

I am responding to your request for feedback on aggressive treatment and improper interview techniques used on detainees at GTMO. I did observe treatment that was not only aggressive, but personally very upsetting, although I can't say that this treatment was perpetrated by Bureau employees. It seemed that these techniques were being employed by the military, government contract employees and
