P.S.O.B. v. L.M.B., [2008], B.C.J. No. 299, 2008 BCSC 213 (Cole J.) (B.C.S.C.), original reasons at [2007]

3 children 10, 8, 4, shared custody, equal time

Husband lawyer, income set at \$160,000/yr

Wife in marketing before marriage (\$45-\$55,000/yr) but home after 2nd child; plan to return to work when youngest child in school

Wife receives inheritance near end of marriage, approx. \$1 million, not family asset; entire amount reapportioned to wife

Husband intentionally increases debts after separation; buys house for \$1.24 million and purchases new car (payments \$607/mo.)

Equal division of family assets; \$865,000 each

Wife not intentionally under-employed; income from investments \$50,000/yr plus interest on equalization payment \$23,800/yr, total \$73,800/yr

Child support: set-off of table amounts incorrectly calculated as \$1,621 (\$3045-\$1424) [but should be \$2824-\$1438= \$1386]; husband ordered to pay lower amount: \$1000/mo (husband paying private school costs)

Original reasons 2007: no order for spousal support; wife has need; budgetary shortfall of \$8,000/yr; but can rent out basement suite for \$6,000, therefore no need; issue of spousal support to be re-examined if valuation of husband's law practice or rate of return on wife's investments not accurate; Guidelines not referred to [range under *shared custody* formula, benefits rotated, calculated as \$575-\$1603]

2008: case re-opened; miscalculation of equalization payment; wife receives \$82,000 less, investment income \$6,560/yr or \$546/mo. lower; wife now in need; spousal support to be re-examined; husband has additional \$6,560 of investment income; spousal support of \$546/mo

Wife argues Advisory Guidelines; court declines to apply; both parties, especially husband, have high debt load and Guidelines not appropriate

[Range under *shared custody* formula, benefits rotated, using adjusted incomes calculated as \$926-\$1954]
