Law and Economics Program

PRESENTS

Symposium on Competition Policy in the Age of Big Data Net Neutrality and Multi-sided Platforms

Today's economy is increasingly dependent on industries that are network oriented and data driven. While this has the potential for tremendous efficiency and innovation it also raises important and complex considerations that competition law and policy will need to confront. Is robust competition policy a viable alternative to net neutrality? Is the existing competition law framework well suited to assess conduct involving multi-sided platforms? Innovative industries are constantly evolving; can competition regulators keep up? The Faculty of Law at the University of Toronto invites you to participate in a lively discussion and debate with leading economists, Competition Bureau representatives and practitioners at its Symposium on Competition Policy in the Age of Big Data. Register [online](#) here. Admission for students is free.

Thursday April 26, 2018

1:00 PM to 6:00 PM

University of Toronto, Faculty of Law

PROGRAM SCHEDULE

1:00 – 1:15
